No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts, 01970) for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1982 articles are the same as for those shown for current articles.

CONTENTS OF VOLUME 11

NUMBER 1, MARCH 1982

G. STRAPPAGHETTI, G. PROIETTI, S. CORSANO, AND I. GRIGURINA. Synthesis of Incensole...	1
MICHAEL A. SCHWARTZ. Catalysis of Hydrolysis and Aminolysis of Benzylpenicillin Mediated by a Ternary Complex with Zinc Ion and Tris(hydroxymethyl)aminomethane	4
K. R. LYNN, C. A. CHUAQUI, AND N. A. CLEVETTE-RADFORD. Kinetic Studies of Mammalian and Microbial Cholesterol Esterases in Homogeneous Aqueous Solutions	19
FRANK SEELA AND JOHANN OTT. Bis(isopropylidene adenosine)—A Novel Base-Stacked Dinucleoside with Two Deamination Sites for Adenosine Deaminase	24
L. O. ZAMIR, E. D. JUNG, AND R. D. TIBERIO. Synthesis of Chiral Arogenic Acid via Immobilized Microbial Proteins	32
ERWIN BUNCEL, DAVID R. FERGUSON, AND T. GEOFFREY FLYNN. σ Complexes as Biochemical and Biophysical Probes. 4. Development of a Novel Reporter Group Delivery System	43
PETER N. LOWE AND R. BRIAN BEECHEY. Preparation, Structure, and Properties of Periodate-Oxidised ATP, a Potential Affinity-Labeling Reagent	55
KAHEE FUJITA, TADASHI UEDA, TAJI IMOTO, IWAO TABUSHI, NAMIKO TOH, AND TOSHITAKA KOGA. Guest-Induced Conformational Change of β -Cyclodextrin Capped with an Environmentally Sensitive Chromophore	72
BERNARD FERRARI AND ANDRE A. PAVIA. Artificial Carbohydrate Antigens: The Synthesis of Glycopeptidic Haptens with T _N Specificity	85
K. R. LYNN AND N. A. CLEVETTE-RADFORD. A Comparison of Esterolytic Mechanisms of Several Sulfhydryl Proteases	96

NUMBER 2, JUNE 1982

MUNISHWAR N. GUPTA AND PAUL J. VITHAYATHIL. Isolation and Characterization of a Methionine Adduct of DOPA <i>o</i> -Quinone	101
KAHEE FUJITA, TADASHI UEDA, TAJI IMOTO, IWAO TABUSHI, NAMIKO TOH, AND TOSHITAKA KOGA. Selective Recognition of Alkanoates by a β -Cyclodextrin Flexibly Capped with a Chromophore	108
JOHN F. ROBYT AND STEVEN H. EKLUND. Stereochemistry Involved in the Mechanism of Action of Dextranucrase in the Synthesis of Dextran and the Formation of Acceptor Products	115
E. E. VAN TAMELEN, A. STORNI, E. J. HESSLER, AND M. A. SCHWARTZ. Cyclization Studies with ($\pm$)-10,11-Oxidofarnesyl Acetate, Methyl Farnesate, and Methyl ($\pm$)-10,11-Oxidofarnesate	133
E. E. VAN TAMELEN AND R. M. COATES. Biogenetic-Type Total Synthesis of ($\pm$)-Farnesiferol A and ($\pm$)-Farnesiferol C	171
E. E. VAN TAMELEN AND R. G. NADEAU. Cyclization Studies with 14,15-Oxidogeranylgeranyl Acetate	197
E. E. VAN TAMELEN AND S. A. MARSON. Biogenetic-Type Synthesis of Hydroxylated Tricyclic Diterpenes in the Pimarane Class	219

NUMBER 3, SEPTEMBER 1982

JOHN LEO ABERNETHY, CHARLES M. LOVETT, JR., ANTON HADDAD, AND JEFF D. FELBERG. Stereoselective Action of Acylated Crude Papain toward Mandelic and Atrolactic Hydrazides.....	251
J. DIOPOH, M. KEITA, AND M. OLOMUCKI. The Chloro- <i>o,o'</i> -Dinitrophenyl Group: Properties and Use in Protein Chemistry.....	262
ROBERT I. GELB, LOWELL M. SCHWARTZ, AND DANIEL A. LAUFER. Acid Dissociation of Cyclooctaamylose.....	274
PETER F. HOLMES, JOACHIM G. LIEHR, AND JACK HENKIN. Synthesis and Characterization of 2'-Azidoaminopterin as a Potential Photoaffinity Label for Folate-Utilizing Enzymes....	281
YOSHIKATSU SUZUKI, H. W. KNOCHE, AND J. M. DALY. Analogs of Host-Specific Phytotoxin Produced by <i>Helminthosporium maydis</i> , Race T. I. Synthesis.....	300
YOSHIKATSU SUZUKI, K. J. TEGTMEIER, J. M. DALY, AND H. W. KNOCHE. Analogs of Host-Specific Phytotoxin Produced by <i>Helminthosporium maydis</i> , Race T. II. Biological Activities.....	313
SETSUOKO NAKAGAWA AND HIDEAKI UMEYAMA. The Role of the Environment around the Catalytic Triad in β -Trypsin: A Molecular Orbital Study.....	322
MICHAEL D. CORBETT AND BERNADETTE R. CORBETT. Enzymatic Generation of <i>N</i> -[4-Dimethylamino)phenyl]acetohydroxamic Acid by the Action of Pyruvate Decarboxylase on 4-(Dimethylamino)nitrosobenzene.....	328
L. O. ZAMIR AND C. C. CHIN. Aromatic Origin of Cyclopentenoid Metabolites.....	338
GORDON A. HAMILTON AND DAVID J. BUCKTHAL. The Inhibition of Mammalian D-Amino Acid Oxidase by Metabolites and Drugs. Inferences Concerning Physiological Function.....	350
JAMES A. NELSON, MICHAEL R. CZARNY, AND THOMAS A. SPENCER. Enzymatic 7 β Hydroxylation of 4,4,10 β -Trimethyl- <i>trans</i> -decal-3 β -ol (TMD).....	371

NUMBER 4, DECEMBER 1982

PAULO BOSCHCOV, WOLFGANG SEIDEL, JOSÉ MURADIAN, MINEKO TOMINAGA, ANTONIO C. M. PAIVA, AND LUIZ JULIANO. Reactivity with <i>p</i> -Nitrophenyl Acetate and Interaction between the Amino and Imidazole Groups of Histidine and Related Compounds.....	383
P. PALUMAA, A. MÄHAR, AND J. JÄRV. Kinetic Analysis of Butyrylcholinesterase Inhibition with <i>N,N</i> -Dimethyl-2-Phenylaziridinium Ion.....	394
RON FENSTEMACHER, HIROYUKI MATSUMOTO, AND R. S. H. LIU. Visual Pigment Analogs from Isomers of 5,6,7,8-Tetrahydroretinal. The Importance of the Trimethylcyclohexyl Ring.....	404
HIROMI KITANO, MAKOTO KATSUKAWA, AND NORIO ISE. Coenzyme Model Reaction in Lipid Bilayers.....	412
W. V. GERASIMOWICZ AND J. F. WOJCIK. Azo Dye- α -Cyclodextrin Adduct Formation.....	420
ROBERTO FORNASIER AND UMBERTO TONELLATO. Effects of Cationic Micelles on the Rate of Reaction of <i>p</i> -Nitrophenyl Esters with Dihydrolipoic Acid and Dihydrolipoylamido Derivatives.....	428
ROBERT C. SMITH. Reaction of Uric Acid with 3- <i>N</i> -Ribosyluric Acid with 1,1-Diphenyl-2-picrylhydrazyl.....	436
VIRGINIA B. PETT, MIRIAM ROSSI, JENNY P. GLUSKER, JOHN J. STEZOWSKI, AND MARIA BOGUCKA-LEDOCHOWSKA. Molecular Distortions in 1-Nitro-9-methylacridine and 1-Nitro-9-aminoacridine.....	443

SHINKICHI TAWATA, MASAYOSHI ETO, AND JOHN E. CASIDA. [Z]-4-Alkylidene-1,3,2-benzodioxaphosphorinane 2-Oxides from Stereospecific Cyclization of 2-Alkylketophenyl Phosphonates and Phosphates.....	457
JACQUES DIPOH AND MARTIN OLOMUCKI. The Use of the Acetylenic Function for Direct Chemical Modification of Proteins.....	463
GUNTER FISCHER, MANFRED SIEBER, AND ALFRED SCHELLENBERGER. The Carbonyl Reactivity of 3-Bromopyruvate and Related Compounds.....	478
AUTHOR INDEX FOR VOLUME 11	485
SUBJECT INDEX FOR VOLUME 11	487

Information for Authors

Bioorganic Chemistry: An International Journal publishes accounts of research on the organic and physical organic chemistry of biological or biologically related reactions. Within this context, manuscripts treating the following topics are suitable for submission:

New enzymic reactions in which the chemistry is apparent by way of starting material and product structures; the elucidation of enzyme reaction mechanisms from the physical organic standpoint; the isolation and structure determination of new natural products which have implications for basic biological reactions; biogenetic-type organic synthesis, in which there are executed non-enzymic reactions based upon substrate behavior in biological processes; the synthesis and behavior of model enzymes; the molecular structure and chemical behavior of enzymes; prebiotic and evolutionary organic chemistry; the chemistry of biopolymers; molecular pharmacology.

Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Bioorganic Chemistry* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Regular articles must feature novel, previously unpublished material or represent full accounts of findings published earlier in preliminary form. Contributions may be either experimentally oriented or entirely theoretical. Articles that are sensibly speculative or constitute new interpretations of older findings are appropriate. Although there is no provision for expedited publication of preliminary disclosures, the editors will consider manuscripts which feature significant new results, described briefly and without a separate experimental section.

Reviews containing apposite subject material are welcome. An acceptable review may embrace the results of various workers in a given area or may feature recent developments from the author's own laboratory. A review that is distinguished by a novel interpretation or representation of earlier findings is especially suitable. Announcements of meetings, new books, or other developments of interest to the bioorganic chemist will be printed upon request.

Address all submitted manuscripts and correspondence to

Dr. Eugene E. van Tamelen
Editor, *Bioorganic Chemistry*
Department of Chemistry
Stanford University
Stanford, California 94305.

Manuscripts should be written in a clear and accurate fashion with careful attention to detail. Submit manuscripts (preferably in English) in triplicate, including the original typewritten copy, with copies of graphs, drawings, organic structural formulas, etc., suitable for direct reproduction by the photo-engraver. All material (including tables, legends, reference lists, and footnotes) should be typed double spaced on one side of 8½ × 11-in. white bond paper with 1-in. margins on all sides. Each page of the manuscript should be numbered. Page 1 should contain the article title, author's name (without degrees), affiliation, a short running title (not exceeding 45 letters and spaces), and an address to which proof should be mailed. Page 2 should contain a short abstract. Acknowledgments may be included as a separate section.

All nomenclature should be simple, unambiguous, and in conformity with the conventions developed by Chemical Abstracts and the International Union of Pure and Applied Chemistry.

In the Methods Section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

Abbreviations should be in accordance with the International System (SI) as adopted by the 11th General Conference on Weights and Measures. Common abbreviations are: meter, m; centimeter, cm; millimeter, mm; micrometer, μm ; nanometer, nm; kilogram, kg; gram, g; milligram, mg; microgram, μg ; nanogram, ng; milliliter, ml; microliter, μl ; molar, *M*; millimolar, *mM*; micromolar, μM ; normal, *N*; millicurie, mCi; microcurie, μCi ; counts per minute or second, count/min or count/sec; disintegrations per minute or second, dpm or dps; centigrade, $^{\circ}\text{C}$; seconds, sec; minutes, min; hours, hr; standard deviations, SD; standard error, SE; percent, %; melting point, mp; boiling point, bp; calorie, cal; kilocalorie, kcal; nuclear magnetic resonance, nmr; infrared, ir; ultraviolet, uv; number, No.; Angstrom units, $\text{\AA}$; cycles per second, cps; parts per million, ppm; equation, Eq.

Tables must appear on a separate sheet with a descriptive title typed double spaced above the table. Tables must be numbered consecutively with Arabic numerals in order in the text.

Figures and graphs are to be numbered consecutively in Arabic numerals and cited in order in the text; legends should be typed double spaced on a separate sheet. Graphs should be plotted with black India ink on white paper no larger than 8.5×11 in., with coordinates properly labeled; grid lines that are shown in the engraving should be inked in black. Original drawings no larger than $8\frac{1}{2} \times 11$ in. (21×27.5 cm) are preferred. The following standard symbols should be used in the legends to the figures because they are readily available to the printers:

Photographs should be kept to a minimum and should be glossy prints with strong contrasts; the magnification should be indicated by a scale where possible.

Structural formulas and chemical equations should be typed or drawn with care, and arranged to fill space economically. Since chemical structures will be engraved directly from manuscript copy, authors are asked to prepare such material using appropriate templates and to check it carefully before manuscript submission.

Footnotes should be designated in text by superscript numbers and listed on a separate sheet, starting with the title; in tables they should be noted by superscript letters and placed at the bottom of the page containing the table.

References to the literature should be cited in the text by underlined Arabic numerals in parentheses. They must appear on a separate sheet, listed in numerical order—i.e., in accordance with order of citation in the text. Styling of references should conform to the following format (authors should refer to Chemical Abstracts' *Service Source Index* for styling of journal titles):

1. L. G. LONGSWORTH, R. K. CANNAN, AND D. A. MACINNES, *J. Amer. Chem. Soc.* **62**, 2580 (1940).
2. R. B. WOODWARD AND R. HOFFMANN, "The Conservation of Orbital Symmetry," 2nd ed., Vol. 1, pp. 15–20. Academic Press, New York, 1970.
3. L. G. LONGSWORTH, "Electrophoresis" (M. Bier, Ed.). Academic Press, New York, 1969.

Galley proofs will be sent to the senior author. Authors will be charged for alterations in excess of 10% of the cost of composition.

Fifty reprints of each article will be supplied free of charge. Additional reprints may be purchased; an order form will accompany proofs. There are no publication charges.
